

# Galaxy FECO Oil

## Strong support, Naturally

---

Product Guide

# What Is Galaxy FECO Oil?

Galaxy FECO Oil is the most THC-dominant option in the range. It is designed for deep, intensive support. Because Galaxy contains the highest THC per drop, dosing must be approached slowly and consistently, with careful adjustment over time.

Clean and predictable: no added compounds, flavours, or harsh ingredients.

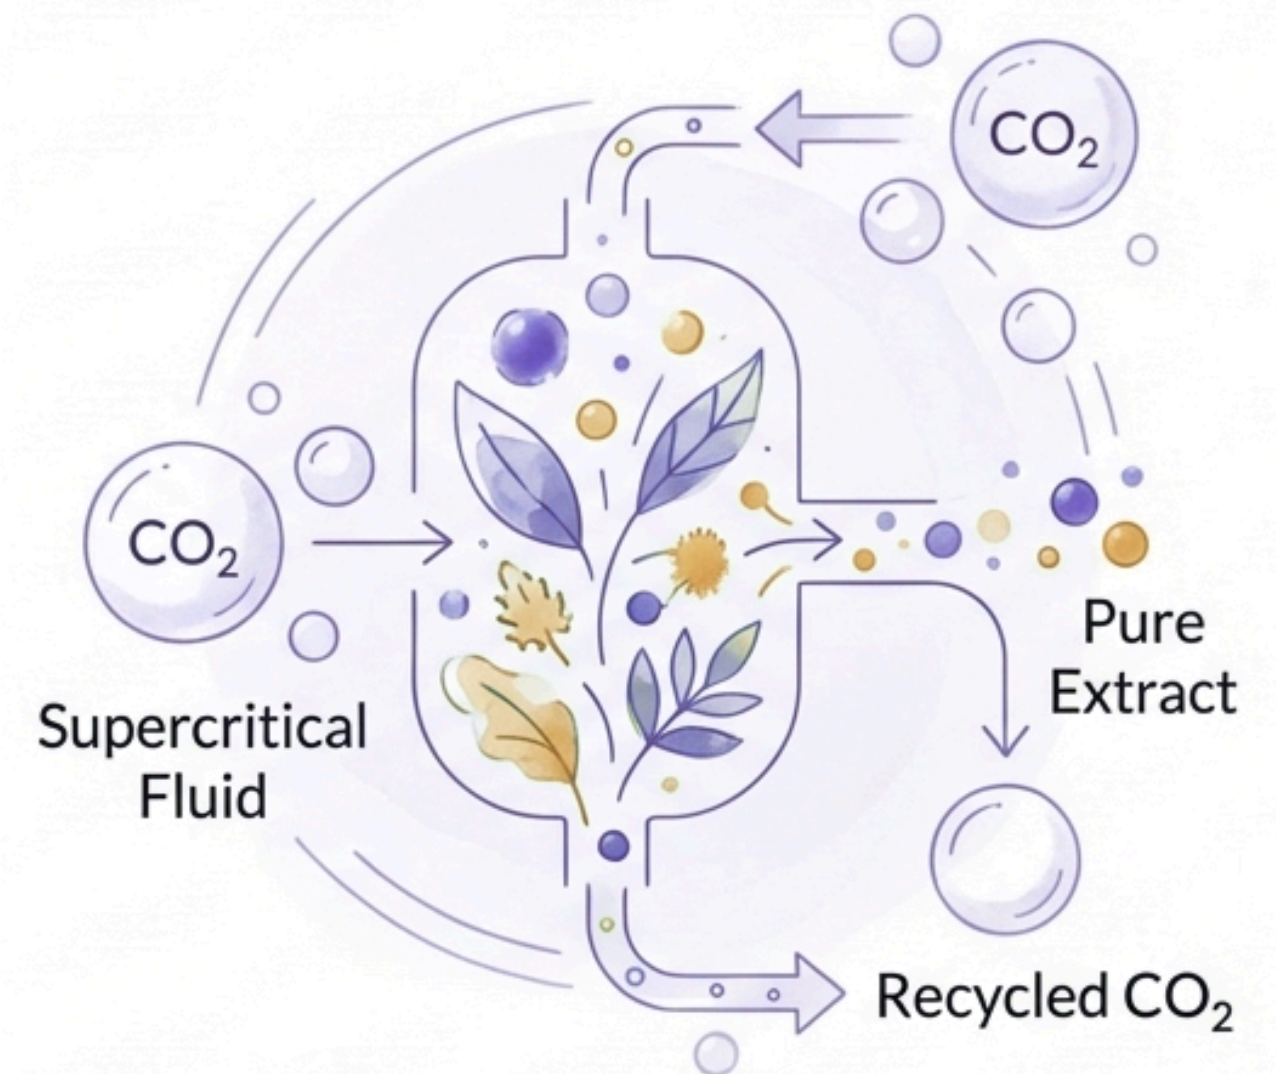

Who is it Best for:

- Individuals with higher support needs
- Persistent discomfort
- Long-term supportive care routines

# What Sets Our Extraction Method Apart

While traditional full-spectrum extracts often use controlled heat and agitation, we have chosen supercritical CO<sub>2</sub> extraction for its greater precision and control. This allows us to work at lower, carefully regulated temperatures, helping preserve delicate plant compounds and supporting a more refined and consistent full-spectrum profile.

This process allows careful control of pressure and temperature, helping preserve the natural cannabinoid and plant profile while reducing excessive chlorophyll, plant waxes, and heavier plant components that may affect flavour, clarity, and long-term stability.

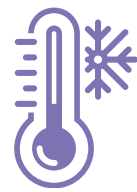

# The Benefits of Supercritical CO<sub>2</sub> Extraction

## Clean and refined

Supercritical CO<sub>2</sub> extraction uses carbon dioxide rather than harsh chemical solvents. This supports a cleaner, more controlled process and helps produce a highly purified full-spectrum extract.

## Low-Temperature Protection

Gentle, controlled processing helps protect delicate cannabinoids and natural plant compounds, supporting a more complete and stable extract.

## Consistency & Reliability

This controlled method allows greater batch-to-batch consistency, helping ensure predictable and steady support.

## Sustainability and responsibility

CO<sub>2</sub> is recyclable and environmentally responsible, aligning with our commitment to conscious and holistic wellness.

# What Is In The Bottle?

## Ingredients

- Full Extract Cannabis Oil (FECO)
- MCT oil (carrier)

## Cannabinoid Strength (30 ml bottle)

- THC: 9.9 mg/ml
- CBD: 3.12 mg/ml

## Approx. per drop (20 drops/ml)

- THC 0.495 mg
- CBD 0.156 mg

## The Free-From List:

- No Additives
- No Fillers
- No artificial compounds

# Why Choose Galaxy

Galaxy is ideal for those who need stronger support without overstimulation. It provides depth and consistency, making it well-suited for individuals requiring reliable, long-term CBD support.

This FECl oil is typically chosen as part of a wellness routine to support:

- Severe or persistent discomfort support
- Inflammation-related discomfort
- Appetite support and nausea settling
- Deep physical switch-off support when rest is a priority
- Supportive comfort routines during serious or long-term health challenges

**Important: This is “may support” language. It is not positioned as a cure or a replacement for medical treatment.**

# How to use: Three Pathways to Absorption

Sublingual  
(Under the Tongue)

The Patchouli Method  
(Navel Application)

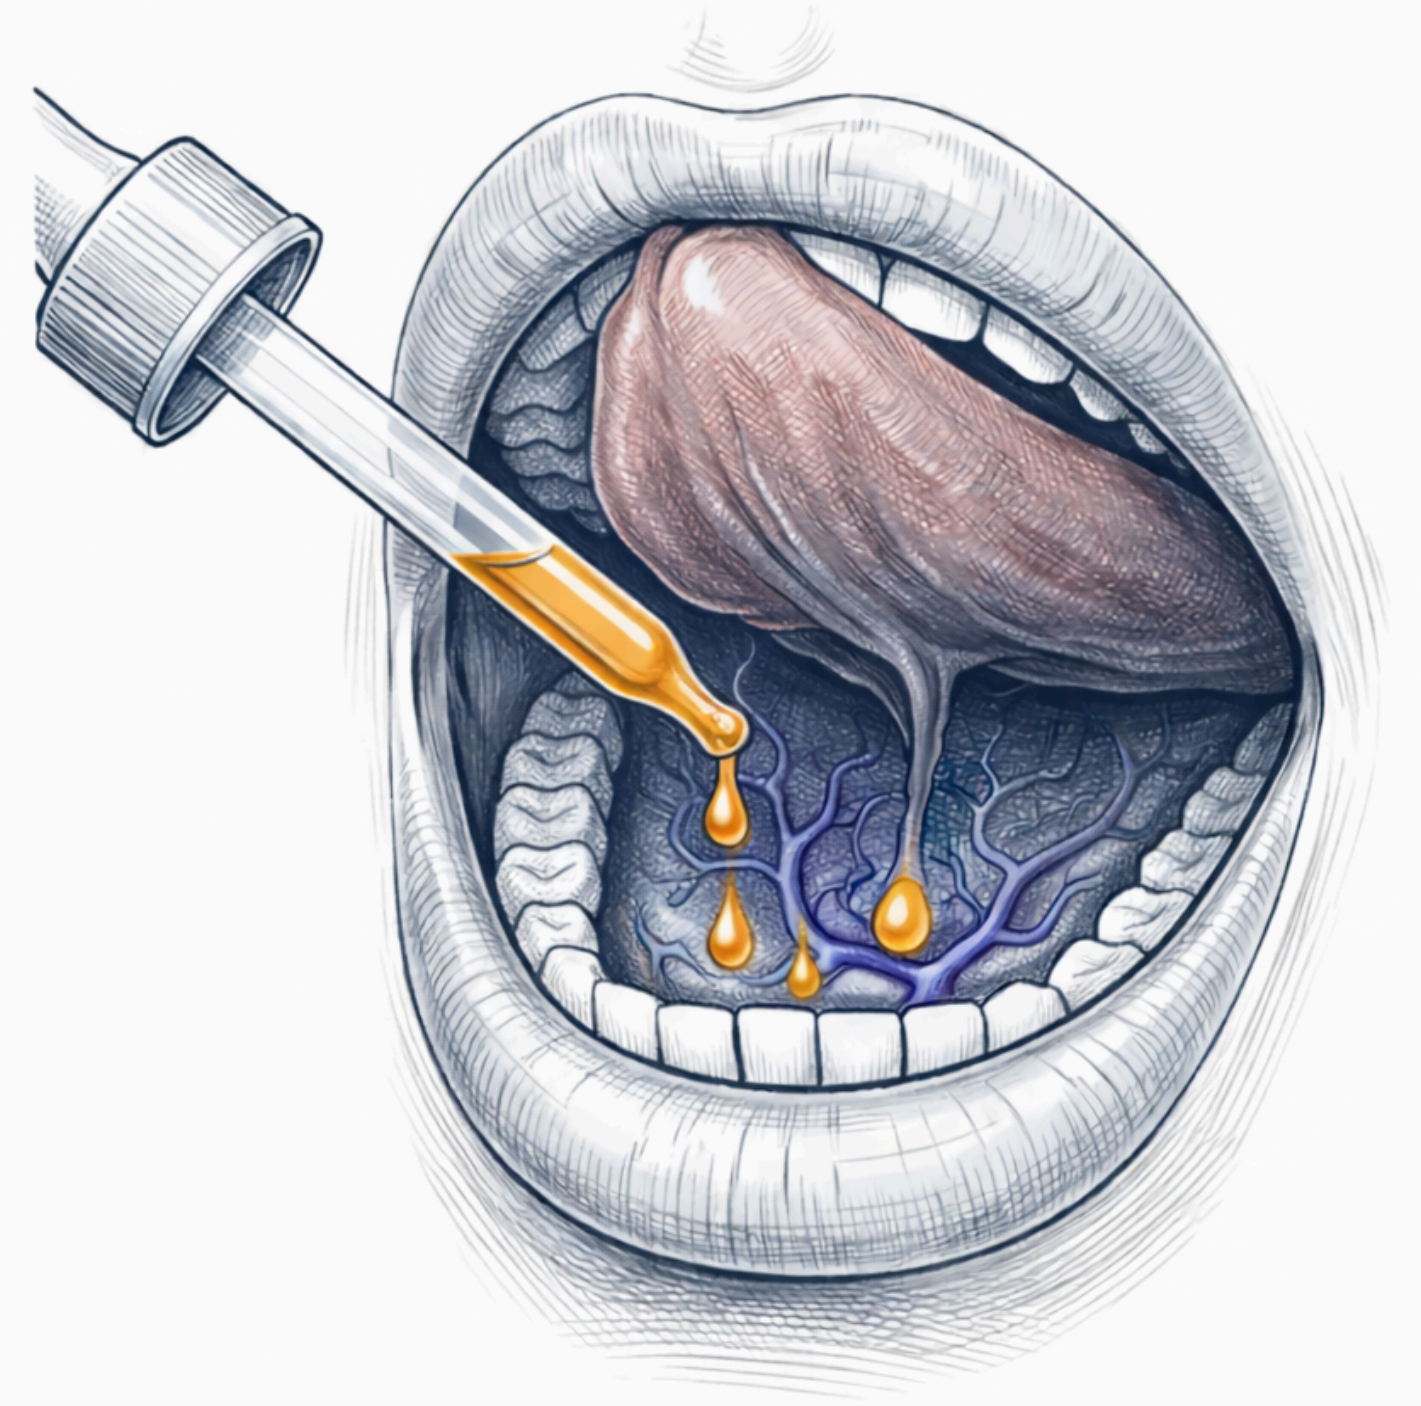

Topical  
(Skin Application)

Each person's body may respond differently to FECO. Body chemistry, sensitivity, lifestyle, stress levels, and consistency of use can all influence how it is experienced. As a result, effects may vary, and finding the most effective method and dosage may take time and gentle adjustment.

# Sublingual (Under the Tongue)

1. Place  
Administer drops directly under the tongue.
2. Hold  
Keep the oil in place for at least **60 seconds**.  
Holding the oil under the tongue allows the plant compounds to be absorbed through the tissues in the mouth and enter the bloodstream directly.
3. Swallow  
Ingest the remaining oil.

Alternative Option: Oral: Add to food or drink if preferred (absorption rates may vary).

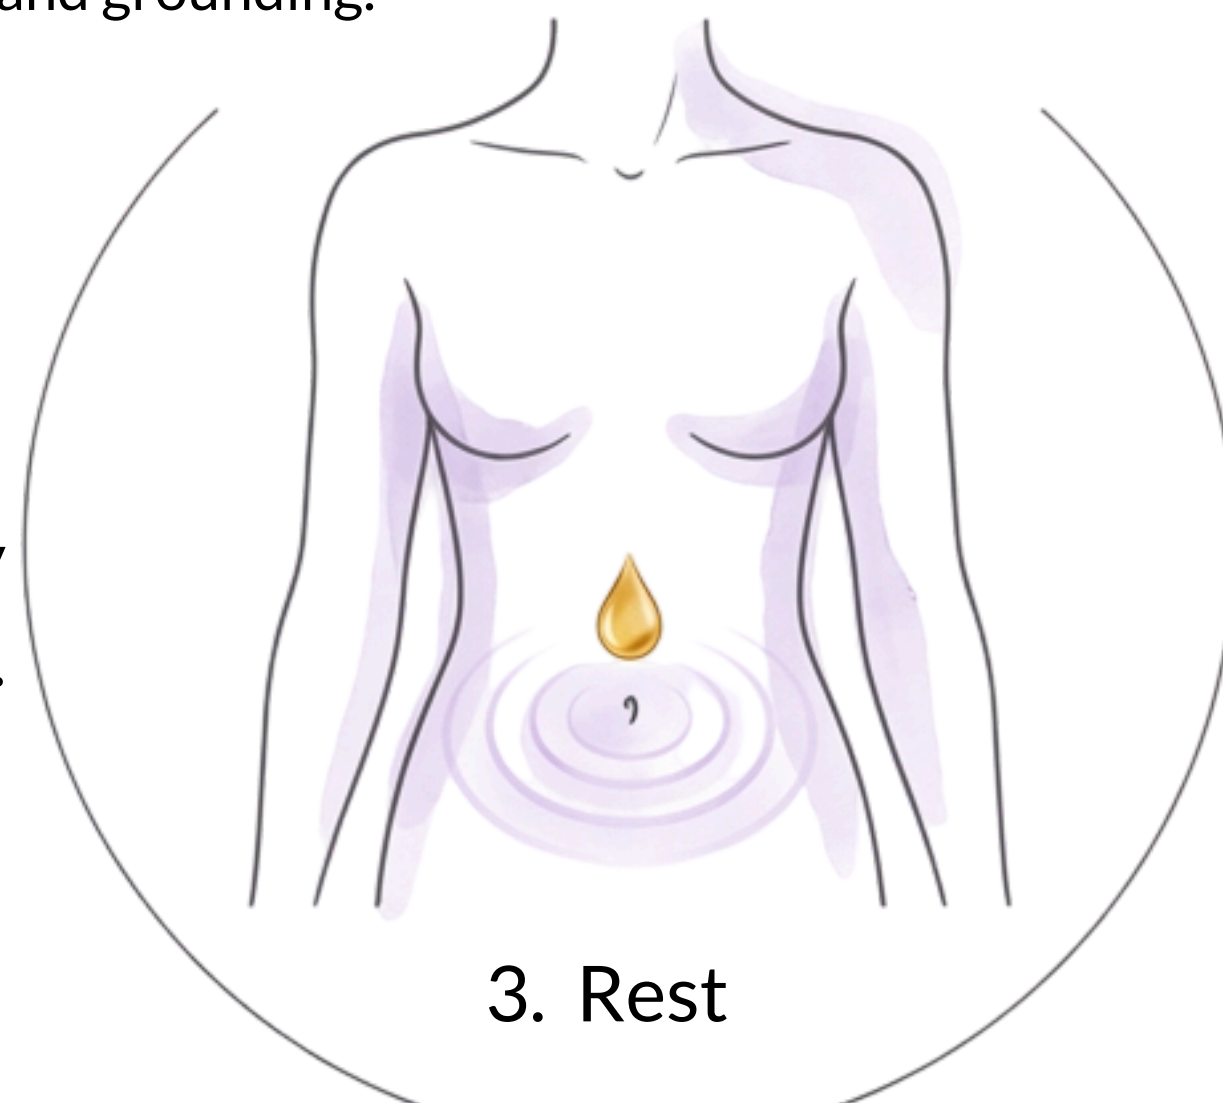

---

# The Patchouli Method

A traditional application method used in holistic wellness practices. The navel area is believed in many traditions to be a central point of energetic balance and grounding.

## 1. Apply

Place the dosage directly into the navel.

## 3. Rest

Allow the oil to absorb naturally into the skin.

## 2. Massage

Gently massage the area to encourage absorption.

---

# Topical Application

## Targeted Support for Physical Discomfort

By bypassing digestion, topical application allows for targeted support where it is applied.

### 1. Locate

Identify specific areas of physical discomfort or tension.

### 2. Apply

Administer drops directly to the skin.

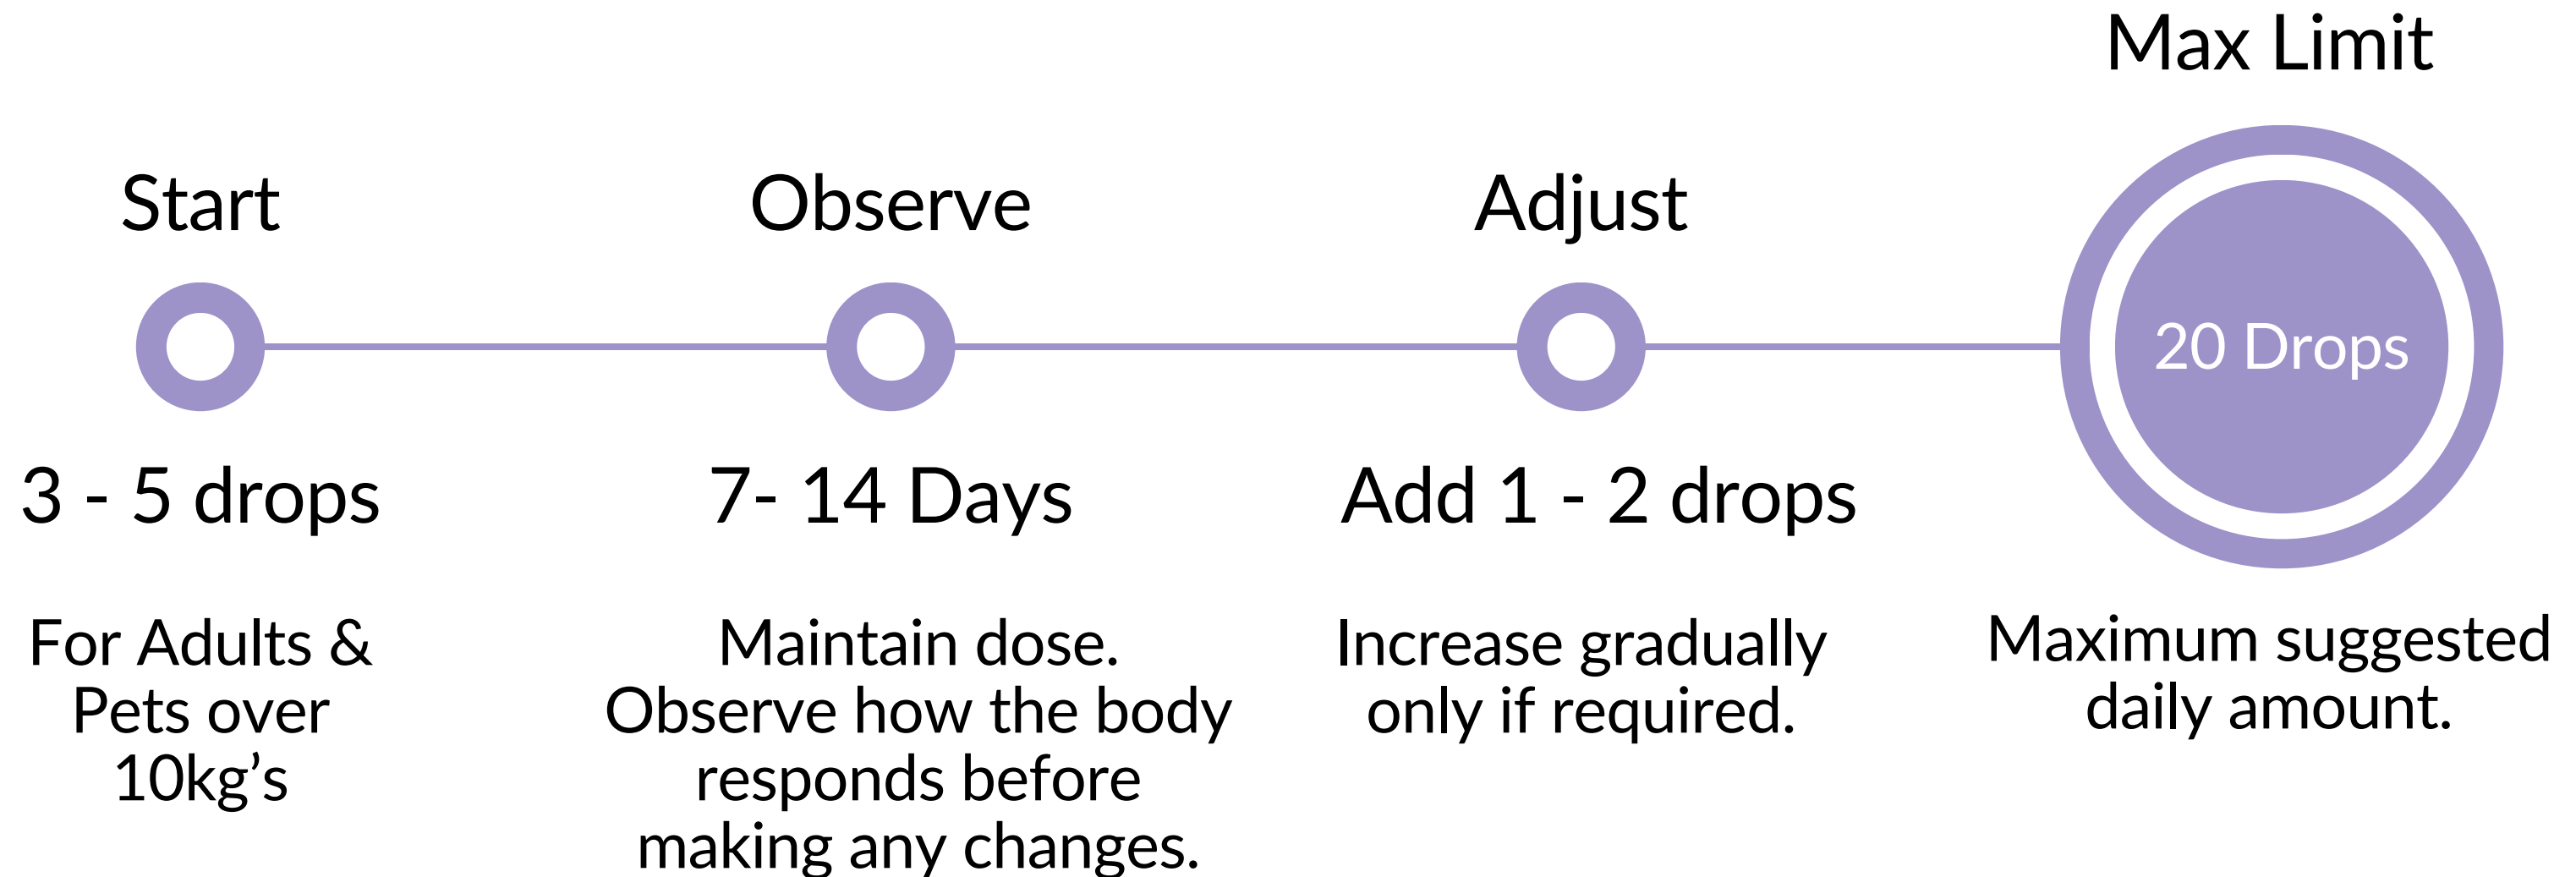

### 3. Absorb

Rub effectively until the oil is fully absorbed.

# Dosage

When to use: Day\* and/or Night

\* Can be taken once in the morning or split into smaller doses (morning & midday)

Galaxy is designed to support resilience and balance over time rather than provide immediate or noticeable effects. Many users report steadier energy, improved regulation, and greater overall support with consistent daily use. Benefits are cumulative and most noticeable with long-term use. This gradual process helps build awareness of the body's needs and responses over time.

# Finding your Sweet Spot

Always observe how the body responds before making changes.

- If more support is needed, increase by 1-2 drops per dose and hold for another 7–14 days.
- Continue increasing by 1-2 drops per dose only when needed, holding each new dose for 7–14 days before changing again.
- Stop increasing once the benefit is consistent (your sweet spot).

## If it feels like “too much”

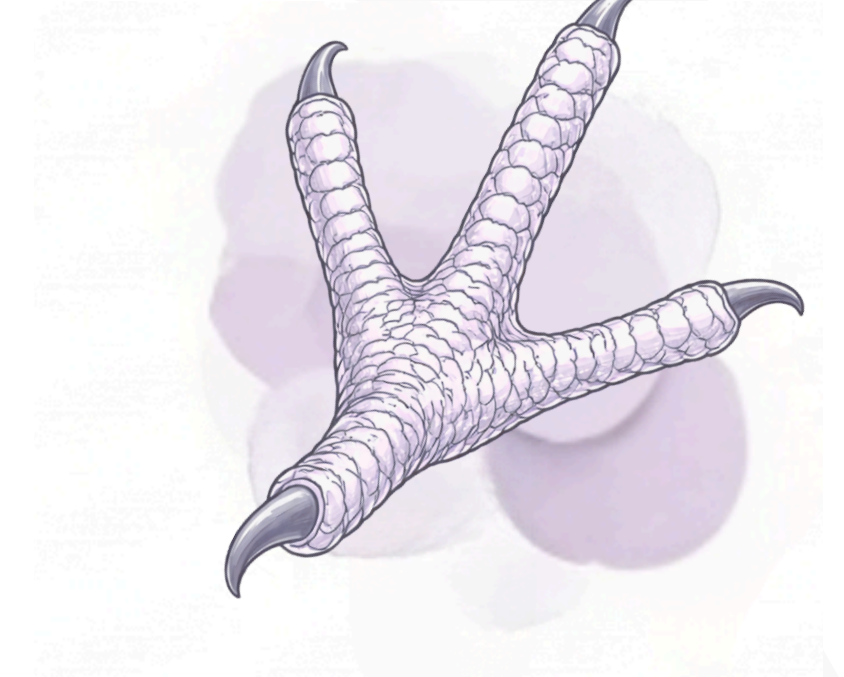

- If you feel overly sleepy the next day, flat, lightheaded, or uncomfortable, reduce by 1–2 drops and stabilise for 7–14 days before adjusting again.

**Individuals with medical conditions, or those using prescription medication, should consult a qualified healthcare professional before adjusting their dosage.**

# Galaxy for Pets Dosage Guide

Pet Weight	Initial Dosage
10kg	Start at 3 drops
15kg	Start at 4 drops
20kg+	Start at 5 drops

*Note: For pets weighing under 10kg, FECO Star may be used..*

# Precautions and Storage

## Storage and care

- Store away from heat and direct sunlight.
- Keep the cap closed tightly.

## Storage and care

- Contains THC. Sensitivity varies from person to person.
- Individuals taking warfarin should not use FECO products.
- Not intended as a replacement for prescribed medication.
- Avoid driving or operating machinery while adjusting your dose.
- Use only as directed
